

Revision of *2011 Emissions Inventory Guidelines* (RG-360A/11)

The map contained in Chapter 1 of the *2011 Emissions Inventory Guidelines* (published in January 2011) inadvertently and incorrectly listed the nine-county Dallas–Fort Worth area (Collin, Dallas, Denton, Ellis, Johnson, Kaufman, Parker, Rockwall, and Tarrant counties) as a moderate ozone nonattainment area. **However, that area was reclassified as a *serious* ozone nonattainment area on January 19, 2011.**

The map was corrected in a February revision of the *2011 Emissions Inventory Guidelines* (RG-360A/11).

Please note that, as stated in January version of the publication, the map and its associated table do not supersede or replace any state or federal law or regulation.

Also, the 2011 Emissions Inventory Guidelines states that “*the official list and boundaries of nonattainment areas are contained in 40 Code of Federal Regulations Part 81 and pertinent Federal Register notices.*”

The Emissions Assessment Section (EAS) apologizes for the discrepancy. **If you have any questions, please contact the EAS help line at 512-239-1773.**
